

ECEN 615 Problem Set #7

**Fall 2020
Due 11/24/20**

1. Search the *IEEE Transactions on Power Systems* to find an important paper that relates to the ECEN 615 material that has 1) not been mentioned in class and 2) doesn't have Overbye as an author. Then
 - a) Prepare a 15 minute Powerpoint presentation on the paper that you will give during class on either November 19 or November 24 (distance learners let me know if you need a different time). For your presentation you may use images from the paper (or other sources); you should just acknowledge your sources in your slides.
 - b) Write and turn in by Nov 24 an approximately one page extended summary of the paper including explaining why you think it is an important paper. This should be a minimum of 750 words.
